How to Delete Saved Passwords from Your Web Browser

If you automatically sign in to websites using stored credentials (username and password) in your web browser you may experience conflicts when you change a password but do not also save the new password to the list of saved passwords in your browser. Additionally, saved passwords are potentially a security risk because it becomes easier for third parties to access your saved login credentials stored in your web browser.

To Remove a Saved Password from Google Chrome (version 62)

Windows and macOS:

1. Click the three-dot menu icon in the top-right corner of the screen and select **Settings**.

2. Scroll down to the bottom of the page and click **Advanced**.

3. Scroll down further to **Passwords and forms** and select **Manage passwords**.

4. Under **Saved Passwords** look in the **Website** list for the website you would like to remove in order to remove the saved password from the browser.

5. Click on the three-dot, **More actions…** icon to the far right of the website name and select **Remove**.

Android:

1. Select the three-dot menu icon in the top-right corner of the screen and select **Settings**.

2. Under Basics select **Save passwords**.

3. Under Passwords select the website you would like to remove.

4. Select the trash icon on the top right of the screen to remove the saved website, username and password.

iPhone:

1. Select the three-dot menu icon in the top-right corner of the screen and tap on **Settings**.

2. Under Basics tap on **Save passwords**.

3. Tap **Edit** and tap on the entry/website you would like to remove.

4. Tap **Delete** at the bottom of the screen.
