A Think College Transition Brief

Put Yourself on the Map: Inclusive Research With and By College Students with Intellectual Disability/Autism

By Maria Palowansky, Ly Hanson, Odgerel Dashzavag, and the Western Massachusetts Student Researchers

The Think College Transition (TCT) project is an inclusive dual-enrollment transition model designed to improve post-school outcomes for students aged 18-22 years who have intellectual disability and autism. The key feature of this model is assisting students to be involved with college classes, work experiences, and social networking opportunities on a college campus with their same-age peers, rather than having typical transition services in a high school. Nine dually-enrolled students on two Massachusetts campuses accepted an invitation to participate in an action research project related to TCT, called Put Yourself on the Map. Students used multiple ways to describe their college experiences over one academic year.

The research facilitators and students collaborated to answer three questions:

1. How do college students participate in action research methods that include the use of digital media tools and apps?
2. How do college students who have taken at least one college class through an inclusive dual-enrollment initiative describe their place and experiences in inclusive college activities?
3. What recommendations do students have to improve inclusive dual enrollment experiences for themselves and others?

RESEARCH METHODS

A number of research method strategies were used in this study to increase student participation in telling their own college stories (Bigby, Frawley, & Rancharan, 2014; Palowansky, 2014; 2010). These included introducing students to an action research model, conducting initial interviews, asking students to chronicle their day with drawing and timelines, using mobile devices and the Livetracker app to track and document their paths around the campus, and digital storytelling.

think COLLEGE!

Think, Hear, See, Believe College: Students Using Participatory Action Research to Document the College Experience

By Maria Palowansky, Allison Saska, Meghan Ahearn, Ashley Santucci, Grace Quinn, Cassidy Bauer, Joseph Fearey, Stephen Wright, Stephen Choi, and Wilson Lee

INTRODUCTION

Nine Massachusetts college students who have an intellectual disability (ID) conducted research on their experiences in college as part of the national Think College initiative. The purpose of Think College is to assist people with ID in going to college. Participatory action research (PAR) is a series of steps the students used to document their college experience. For their research, they used digital and video cameras to collect information. To share their experiences with each other they also used VoiceThread, a digital storytelling website. This issue of Insight describes how students are using PAR and digital storytelling on VoiceThread to discuss their college experience.

WHO ARE THE RESEARCHERS?

The student researchers are from four colleges that support students with intellectual disabilities. The only requirement was that the students had completed at least one full semester of college so they could comment on the whole experience.

WHAT IS PARTICIPATORY ACTION RESEARCH?

Participatory action research is a way for a group of people to investigate issues of interest or concern. To do this kind of research, people first describe the issues as thoroughly as possible and then brainstorm solutions. Then they try out some of their solutions to see if they are effective. After giving these solutions some time to work, the researchers get back together to reflect on what happened and to make a decision about what else needs to be done. For this research, students used PAR and digital storytelling to report on college. Both these methods encourage participants to take and share photographs that help other people understand their college experiences.

STEPS OF PARTICIPATORY ACTION RESEARCH

The students followed six steps beginning in January 2009. Starting with the camera illustration, and moving to the right, the Participatory Action Research figure shows the steps of the students' work:

1. In the **first step**, the students **documented** their college experiences with cameras or pocket video cameras.
2. In the **second step**, the students **shared** their photos or video clips with the other students on the VoiceThread website.
3. In the **third step**, the students **discussed** their data, commenting on their own and each other's research.
4. In the **fourth step**, the students made **recommendations** for changes that they thought could help improve the college experience.
5. In the **fifth step**, the students decided on **actions** they could take as a result of their research.
6. Finally, in the **sixth step**, the students **reflected** on their research and decided if more needed to be done.

District:	Semester:	

KEY: LEVEL OF ASSISTANCE*

- HIGH** 1. **PHYSICAL ASSISTANCE** – ed coach provides “hands-on” assistance to help a student complete a task or skill
 2. **VERBAL** – ed coach provides a spoken direction, reminder, or prompt (may be paired with a gesture)
 3. **GESTURAL** – ed coach points or uses facial expressions/body language (may be subtle or overt)
 4. **MONITOR** – ed coach observes student from a distance; able to jump in to assist if needed
LOW 5. **MASTERY/INDEPENDENT** – student completes skill or task on his/her own

**It is possible you may need to use two numbers to rate your student if he or she is progressing into a more independent mode. For example, “Student greets classmate” rated 2-3+, means he/she performs when provided either a verbal or gestural cue to complete this skill. (Use the comment box to note any specific circumstances where the student performs either higher or lower on the scale.)*

Date of completion: _____

Campus Navigation & Travel					
able to navigate campus to get to a variety of places					
able to travel to college via non-school based transportation					
able to locate specific places on campus (bookstore, disabilities services, safety office, etc.) and use them for intended purpose					
Time Management & Organization					
able to follow: class schedule, meeting schedule, internship schedule					
Demonstrates time-management skills: arrives to campus on time, arrives to class on time, gets to meetings/activities/on time, gets to internship on time, turns in assignments on time					
Effectively uses a planning tool such as an agenda book, calendar, e-calendar to keep track of activities, homework, and appointments					
able to create a plan for completion of homework/projects, and follow it					
Demonstrates organizational skills by keeping class papers in designated folders (syllabus, handouts, etc.), having writing supplies in backpack, maintaining a schedule/agenda, having a lunch in backpack or money for food in wallet, having other necessities for the day					
Classroom & Campus					
Comes to class prepared with materials, books, homework, writing tool, etc.					
Greets classmates					
Makes or responds to small talk from classmates					
Participates in class by joining in discussions and/or answering or asking questions					
Takes notes					
Understands and uses syllabus					
Is observed to be attentive to the instructor					
Carries college ID card daily and uses it for necessary campus activities – library, use of gym, etc.					
able to use the library effectively: checkout/return books; use computers; speak to librarian for info or assistance					
Self-Advocacy & Self-Awareness					
able to request help or information from professor, ed coach, program staff, others					
Can express concerns, express success, make choices, set goals, identify strengths, identify challenges					
Uses self-reflection tool to self-evaluate work/classroom/social performance to determine personal areas of need for improvement					

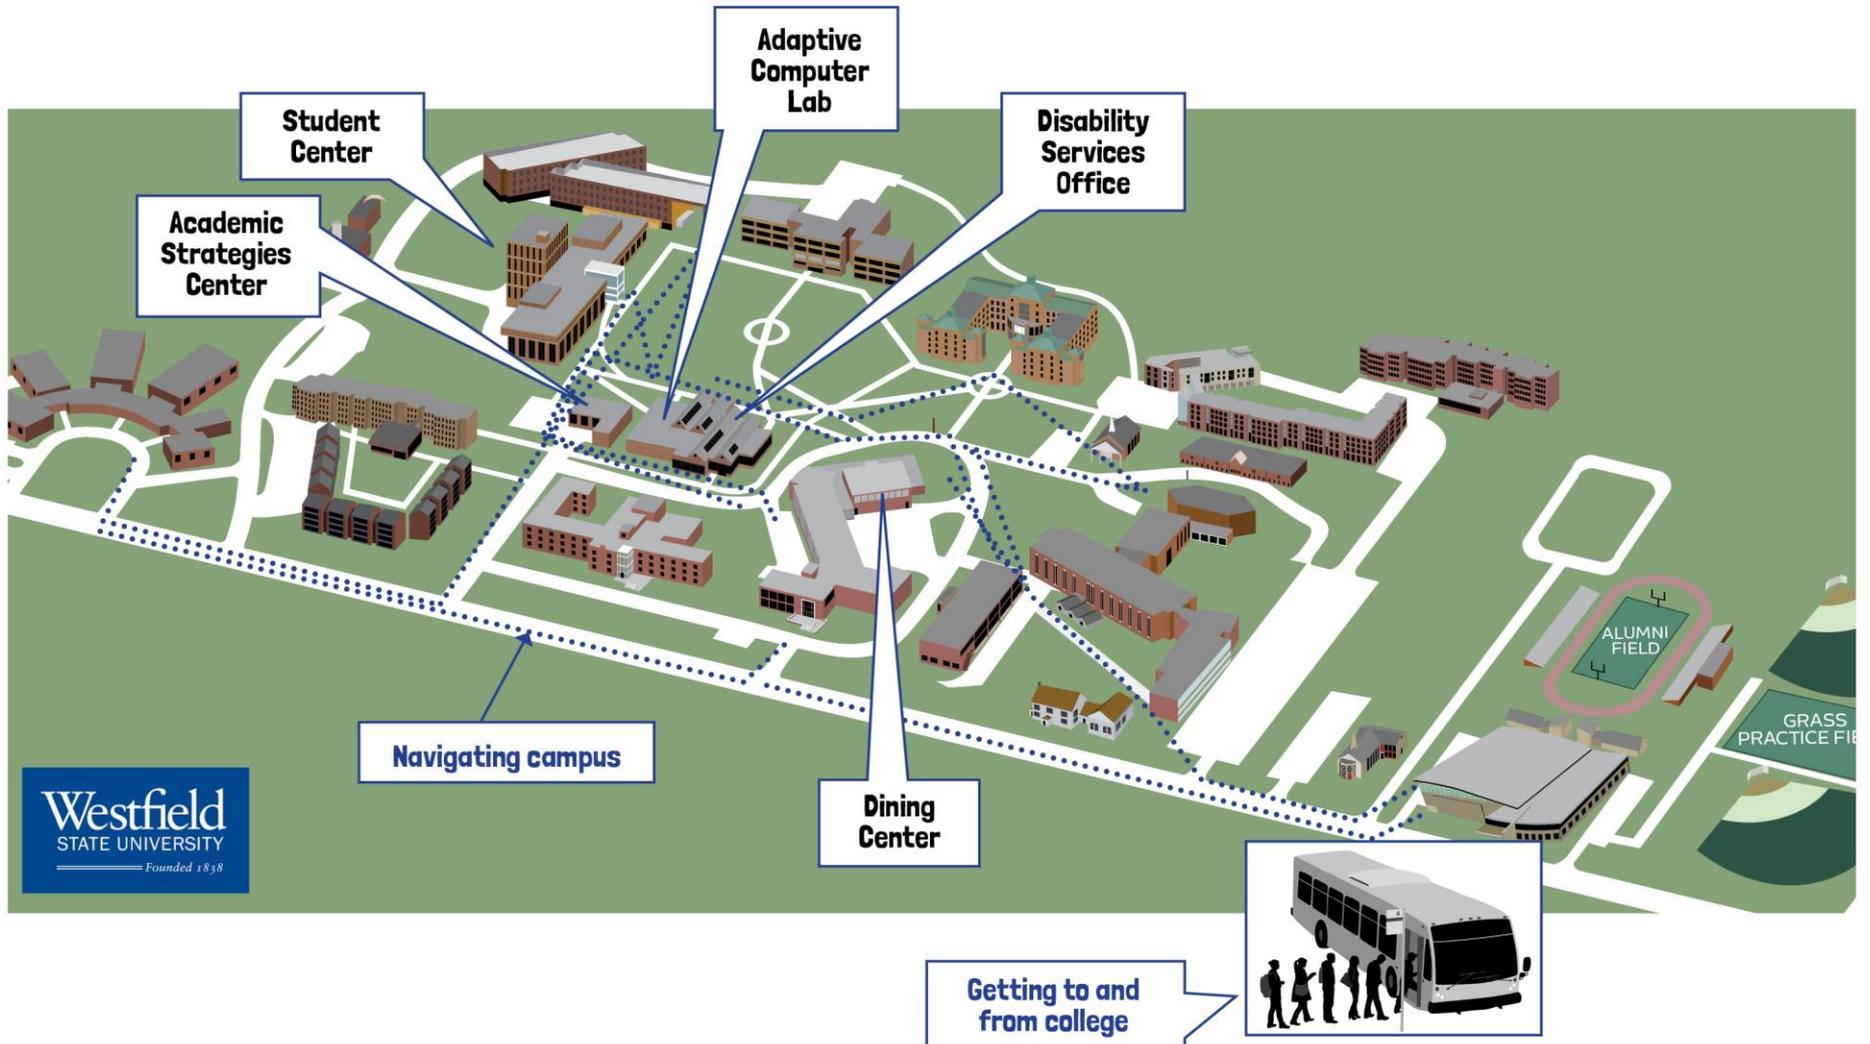

Social & Communication					
Demonstrates ability to access and use college email to communicate with ed coach, professors, program staff, peers, and others.					
Composes email with greeting, message, closing, signature					
Knows the names of other program students, professor, peer mentor, classmates, and others					
Engages in at least one social or club activity on campus each week					
Joins peers at lunch or free time					
Informs key people (ed coach, professor, bus driver, program staff, etc.) when going to be absent or late via phone call, text, or email					
Vocational/Internship					
able to follow basic directions					
Attends to tasks without distraction or interruption					
able to express need for assistance or need for clarification of directions					
Moves from one task to another independently, OR Asks “What’s next?” OR Follows a checklist of tasks to be completed					
Uses the Work Based Learning Plan with the ed coach and Employment Specialist to track progress					
Lifeskills					
Dresses appropriately for the weather, or for the situation (internship, special activity, etc.)					
Has enough money for food desired					
able to acquire food in the cafeteria following standard etiquette – waiting in turn, speaking clearly to server to state choices, managing tray, etc.					
able to pay cashier and wait for change, while managing tray of food					
Cleans up table and throws out trash after eating					
able to use restroom independently					
Covers mouth when coughing/sneezing					
able to match voice loudness to the setting					
Notes / Comments					
#1.					
#2.					
#3.					
#4.					

NOTE: Adapted from documents obtained from MANCI Program: Gateway Scholars program at Roxbury Community College, Boston, MA.

College Campus

College Campus Participation

College expectation	Secondary preparation
Getting to and from college	Early use of alternative public transport; apply for ADA/regional transit options. Build opportunities to plan travel to/from school
Navigating the campus	Build in opportunities to move about independently-increase duration, locations, time limits
Student Center	Create opportunities for students to plan their free time (e.g., meet friends, buy beverage/snack, managing campus card)
Disability Services	Review IEP for successful learning accommodation strategies/ self-identify disability
Academic Strategies Center/Adaptive Computer Lab	Build in opportunities to use accommodations rather than modifications/ review technology used in IHEs
Dining Center	Encourage students to buy lunch/ consider healthy choices/ socializing

Community Transportation for Transition-Aged Youth with Disabilities

The transition years offer an opportunity for students to prepare for life after school-based services. While students pursue their dreams of employment, post-secondary education, or other opportunities, they should also prepare for how they will get to these locations after they no longer receive school transportation. Learning how to drive and/or use community transportation options in their communities can be an IDP and transition goal with classroom and community activities, and/or a family activity. Transition specialists can help students learn to use transportation, and can also provide referrals to community-based services such as travel training. Students who learn about transportation and how to seek-matching their transportation-needs while still in school will be better prepared for success after transition.

Finding Transportation Options

- PUBLIC TRANSIT:** Find out if a transit authority is available near you and then contact them to learn more: www.mass.gov/info-details/public-transportation-in-massachusetts
- RIDE MATCH:** Find services near you in this online, searchable database of public and private transportation services in Massachusetts: www.massride.com
- CARPPOOL DATABASE:** Sign up to find a carpool facility. You don't have to have a car or be able to drive to travel as part of a carpool: www.mass.gov/info-details/carpool-database

Explore more options: www.mass.gov/in-looking-for-transportation

Learning to Use Community Transportation

- TOOL FOR EDUCATORS:** This new tool from Easter Seals helps educators support students in using a variety of modes: www.easterseals.com/info/online-resources/transportation/transportation-guide.html
- TRAVEL TRAINING:** Professional service teaching people with disabilities the skills and information they need to ride fixed route public transit independently and safely: www.mass.gov/service-details/learn-to-ride-fixed-route-public-transit-independently
- DRIVING RESOURCES:** www.mass.gov/service-details/driving-resources-in-massachusetts

Creative Examples of Community Transportation Services

Transportation options in many communities – especially rural or suburban areas – can be limited. Human service organizations, transportation providers, and others can partner to coordinate services or implement best practices to help fill gaps. Here are some examples of creative approaches underway in different regions around Massachusetts:

- CROSTOWN CONNECT:** Active and surrounding towns coordinate transportation resources to improve mobility for older adults, as well as for commuters coming from the city to suburban-based jobs
- GUARDSHIP CONNECTOR:** Organizations partnered with a municipality in rural Central Massachusetts to launch a new service in a low-income, underserved area
- COMMUNITY ACCESSING RIDES:** Organizations in Southwestern Mass collaborated to fund Uber rides for their commuters when the bus was not running or in areas not served by public bus
- CAPE COD ACCESSIBLE TRANSPORTATION:** Trained authority partnered with a human service agency to offer wheelchair-accessible, taxi-like ferry services because no wheelchair-accessible taxicabs were available on Cape Cod

To learn more about how transportation coordination can expand mobility, visit: www.mass.gov/info-details/community-transportation-coordination. Learn about funding opportunities for creative transportation projects at: www.mass.gov/info-details/funding-for-community-transportation.

MASS MOBILITY

This initiative was created by MassDOT, an initiative to increase mobility for all able, along with disabilities, veterans, low-income commuters, and other special transportation needs in Massachusetts. MassDOT is a leader in the mobility ecosystem. www.mass.gov/info-details/mass-mobility

Total			

Developing good study habits can be a challenge, especially if you already have a busy life. But don't dismiss the importance of studying.

Want to aim for the best study habits possible? The ultimate goal would be for all of your responses to appear in the "Already Do" column.

So take a look at your "Plan to Do" column and give one or two of the items listed a try. By improving just one or two additional study habits, you may soon see a jump in your test scores. And that's what developing good study habits is all about!

THINK COLLEGE STORIES

BELONGING ON CAMPUS

JANUARY 2014

By Kenneth Kelly, with Seb Prohn

I am a student at Western Carolina University where I am a part of the University Participant (UP) Program. I want to share my thoughts and experiences about inclusion in college. To me, inclusion means that all people should be allowed to live fully without limitations and go places just as everyone else gets to go—like college! Inclusion is important because it gives people with intellectual and developmental disability (ID) a chance to do all the same things as everyone else with nothing holding them back.

There have been times in my life when I felt left out. When I was in the 5th grade, I was a member of the school safety patrol. Each year the school would take a group of safety patrol students to Washington, D.C. to see the sights and have fun, but because of my autism and ID the school did not want me to participate. I was excluded.

This made me sad because I really wanted to go to Washington, D.C. with my friends. I was also mad because they would not let me go even though I could do almost anything the other kids could do. In the end I got to go because my mom challenged the school. She let them know what I wanted everyone to know: I should not be denied an opportunity because of my disabilities.

This was the night that Vinco first said "you are one of the brothers."

Academic Inclusion

At WCU, I take the same classes as all other college students. If I need to, I can go to the office of disability services and they help me access accommodations. In college classes, I do the same work as all of my peers. It was my choice to enroll in the four college classes I am taking right now, which are Global Issues, Facebook Generation Marketing, Career Exploration, and Foundations of Communication.

Each of my professors includes me personally. They want me to participate in their classes and they want to help out. In my communications class, the professor asks me if I understand the topic and makes sure I have a partner for projects. Also, my past and current professors know my name. They will say "Hi!" if they see me around campus.

My classmates include me by introducing me to people they know in the class, and when we are working on assignments together we help each other out. Over the semesters some of my classmates have become friends, and instead of just doing academic work together, we now just hang out and share meals together.

Work Inclusion

Every semester I've been in college I've had several jobs at WCU. I've worked in the campus mailroom, the International Studies office, enTOURage (a group of student guides hired by the Office of Admissions to give tours to prospective students), the Severe Disabilities Grant office, and campus creative services. In each of these jobs my co-workers always made sure I understood everything and we all worked

To me, inclusion means that all people should be allowed to live fully without limitations and go places just as everyone else gets to go—like college!

A lot has changed in the last decade. I've gone from others wanting to leave me out to being invited to speak at the 2013 American Evaluation Association conference in Washington, D.C. When I speak at conferences, I try to spread awareness about including people with ID on college campuses and in communities.

At Western Carolina University (WCU), I took part in a social inclusion research project. Now I use my data—pictures I took on my college campus—as a way to reach out to others about the ways I feel very included on my campus. In this story I want to do the same thing and explain the ways I feel included, with the hopes that you will make your campuses and communities more inclusive.

Think College TRANSITION PROJECT

GRAB AND GO PRACTICES

FACILITATING SOCIAL CONNECTIONS ON CAMPUS

by Mary Ann Brennen, Ty Hanson, Ross Hooley, and Lauren Nastari

Issue No. 4

INTRODUCTION

College is an ideal setting to develop and expand a person's social network. Using strategies that maximize social opportunities centered around shared interests and common experiences can often lead to the development of authentic friendships and increased campus membership. Educational coaches are in an ideal position to recognize opportunities for social engagement and to support and encourage students to develop social networks and new friendships. Effective coaches believe that friendships are critical to a person's overall well-being, and that friendships are possible, regardless of a person's disability.

MAKE CONNECTIONS TO FAMILIAR PEERS

An important way for coaches to facilitate connections is to recognize who the student already knows on campus, and to consider how those casual acquaintances can be strengthened and deepened. For example, some students receive support from a classmate for note-taking, or have been connected to work on group projects by the instructor. Although those roles are different from being friends, coaches have opportunities to facilitate friendships through these experiences by encouraging the student to invite classmates to connect outside of class.

In another case, some students may recognize other people on campus who went to their high school. Coaches have an opportunity to capitalize on these connections by suggesting to the student that they invite this classmate to meet up for lunch or simply hang out at the campus cafeteria. Just spending time together at the cafeteria can lead to meeting each other's friends, thus widening both students' social network.

CONNECT STUDENTS THROUGH INTERESTS

Another way students get to know others is through shared interests. For instance, a student may have a talent using technology to create presentations or to find information on the college

Inclusive Dual Enrollment Student Support for College Success

The Student Support for College Success Grab and Go series summarizes best practices for coaches and mentors who support dually enrolled students with intellectual disability on college campuses. A checklist for educational coaches is included.

app. Less tech-savvy students may benefit from this expertise and appreciate learning from a college peer. This could then lead to increased time spent together as they get to know each other.

Similarly, a student who likes radio production may enjoy being at the campus radio station with other students who share the same passion.

Finding out a student's interests can be accomplished by asking them directly, or by checking with others such as family, teachers, and friends.

TAKE ADVANTAGE OF STUDENT ACTIVITIES AND CLUBS

Teaching students how to pursue interests is a great way to make friends. Coaches can help students find time in their schedules to visit the student activities office to get a calendar of events and a list of clubs available on campus. Encouraging students to attend a campus club expo at the beginning of the semester is a perfect opportunity for students to explore the variety of club offerings. Remember, though, that going once to a club meeting will not provide enough time to make a friend. Coaches can help students build time into their weekly schedule to attend club events regularly, thereby providing maximum opportunities for students to get to know each other. Similarly, identifying volunteer opportunities on or off campus where students work together toward a common goal can foster social connections. Finally, encouraging students to work out at the campus athletic center is a natural way for them to make friends. Going to the gym on a regular basis at the same time and on the same days is going to increase the chances that they will see and become familiar with the same people exercising.

Preparing secondary staff

- Presenting college as a postsecondary option
- Advocating for raised expectations and access to curriculum with clear standards
- Attending IEP meetings to discuss PSE options
- Preparing students for the differences between high school and college expectations

Preparing secondary staff

Taking into account:

- development of self-determination
- disability awareness,
- accommodation awareness,
- mobility training,
- emotional health, &
- safety

College-based transition services (CBTS), also known as dual enrollment or concurrent enrollment, provides students with intellectual disability during their final two to three years of secondary education access to college courses, internships, and employment, as well as access to other campus activities.

When designed well, these experiences enable students to participate in career planning with a person-centered planning approach, enroll in college classes for educational and personal enrichment, engage in social activities alongside their college peers, and participate in community-based, paid work experiences that align with their employment goals.

Developing CBTS opportunities takes a commitment from K-12 school systems and college partners. This means understanding the roles of each stakeholder group, sharing the responsibility of communicating the partnership to key educational personnel, and determining what policies and practices need to be developed or enhanced to create this new model for inclusive college-career options.

Among the tasks that school-college partnerships assume are establishing a memorandum of agreement that articulates the roles and responsibilities of each member, developing a timeline for college preparation and enrollment, designing individualized student schedules, and accessing college and community resources.

Family Resources

As the parent or family member of a young adult with intellectual disability, you may have heard a bit about Think College or seen videos or articles describing how students with Down syndrome and other intellectual disabilities are attending colleges and universities all over the United States.

We put this page together to respond to the most frequently asked questions that families have about college options. [Let us know](#) if you have more questions after reviewing these resources.

Is College Possible?

These resources illustrate students with ID accessing college.

- Read some [Think College Stories](#) that share the perspectives of successful college students with intellectual disability.
- Share info about college options for students with ID with teachers, parents and students with our [We Can series](#).
- This [Think College Learn module](#) shares resources and videos that help families and students learn more about college options.

How to Prepare

Students in middle school and high school can be working on preparing for college!

- [Suggested IEP Goals](#) that help students get ready for college
- [Suggestions for Parents](#) to help students prepare for college
- [Twenty Powerful Strategies to prepare for college](#)
- Use this [Foundation Skills for College and Career Learning Plan](#) to help your son or daughter to prepare for college.

How to Apply

When students are applying to attend a college program for students with ID, there is typically a different admissions process than the one used by degree-seeking students.

Unlike students who are applying to college through the standard admissions process, students will **NOT** need a regular high school diploma or SAT or ACT scores. They **WILL** need documentation of disability and support needs. Check the website of programs you are interested in to learn more about specific requirements.

Can I afford it?

College is expensive, and paying for it is never easy. The good news is that students with intellectual disability can be eligible for financial aid even if they don't have a HS diploma. Students can also now save for college through the use of an ABL account. Others may get support from a community agency such as Vocational Rehabilitation, or receive scholarships to help cover costs.

Learn more about these and other strategies to pay for college on our [Paying for College](#) page.

How do we find the right college?

- Review program details in the [College Search](#) listings.
- Once you have a list of possibilities, contact the program to ask questions/schedule a campus visit.
- Use our [How To Guide on Conducting a College Search](#) and this [Self-Advocates Guide to Selecting a College](#) to learn more about programs you are interested in.
- Contact us if you need more information or help deciding on the best fit.

Differences Between High School and College
